About Me

Hello! I'm Dmytro Cherniavskyi, a dedicated DevOps Engineer with a strong background in system administration and cloud technologies. I excel at implementing automation solutions using Terraform, Ansible, Helm, and scripting tools like Bash and Python. My focus is on delivering efficient, scalable, and secure systems to support business growth.

Skills

- Cloud Platforms:** AWS (SAA Certified)
- Automation Tools:** Terraform, Ansible, Helm
- CI/CD:** GitHub Actions, CircleCI
- Containers:** Docker, Kubernetes (CKA Certified)
- Scripting:** Python (Boto3), Bash
- System Administration:** Linux server management, performance tuning

Certifications

- Terraform Associate**
- AWS Certified Solutions Architect – Associate (SAA)**
- Certified Kubernetes Administrator (CKA)**
- AWS Certified Cloud Practitioner (CCP)**

Projects

Automated Cloud Infrastructure with Terraform

Designed and deployed scalable cloud infrastructure on AWS using Terraform. Automated provisioning of VPCs, EC2 instances, and RDS with reusable Terraform modules.

Kubernetes Cluster Management with Helm

Developed Helm charts to streamline the deployment of microservices in Kubernetes. Improved deployment efficiency by automating release workflows.

CI/CD Pipeline for Microservices

Built a GitHub Actions pipeline to automate testing and deployment for a multi-container Docker application. Reduced deployment time by 40%.

Infrastructure Automation with Ansible

Automated server provisioning and configuration for a large-scale e-commerce platform using Ansible. Enhanced reliability and reduced manual effort.
